

## Marvellous Mummies!

This term we will be finding out about ancient Egypt.

In literacy we will share stories and information books about ancient Egypt. We shall write our own stories and poems, make information posters and use lots of interesting words! Our science topic will be Sound. We will be learning how we hear, how sounds travel and we will be creating our own investigations. We shall also be investigating the seasons and how the seasons change.

For our Expressive Arts we will be drawing, painting and modelling using ancient Egypt as our starting point. Our music lessons will concentrate on rhythm and pulse, also including lots of songs about Pharaoh's and Mummies! In maths we shall be working on the four calculations of addition, subtraction, division and multiplication. We will also be practising number bonds, times tables and number patterns. We shall learn about shapes and investigate their properties too.

PE will be on a Tuesday afternoon with Mr Ward, but please can PE kits be kept in school as we often do other physical activities! Outdoor learning will still be on a Friday so please come to school in old clothes and have a pair of wellies in school. Remember - parents welcome to share our outdoor experiences!

This is a very exciting topic and I am sure we will all have lots of fun whilst we are learning!

Mrs Davies
